

Get serious about skin care with the new
restoreTM disposable brief

- > Treated with Remedy Skin Repair Cream to nourish and protect skin.
- > 100% breathable side panels promote airflow for maximum comfort.

“Finally, an incontinence product that keeps skin healthy, not just dry. Why didn’t someone think of that before?”

restore *is the only disposable brief that keeps skin healthy and dry!*

Inner liner treated with Remedy Skin Repair Cream:
Protects and nourishes skin

Anti-leak cuffs:
The best leak protection possible

Comfort-Aire side panels:
100% breathable for better airflow

Super-absorbent Ultra Care core:
Keeps skin dry

Soft, cloth-like outer cover:
Prevents skin irritation

“A brief that actually nourishes our skin?
We like that.”

Advanced skin protection, built right in.

Medline's Remedy Skin Repair Cream is applied to the entire length of the Restore brief's inner liner as part of the manufacturing process. This exclusive, all-natural cream helps to prevent skin breakdown.

- > Restores and maintains skin's natural moisture balance while delivering vital nutrients to the skin.
- > Based on Olivamine*, a proprietary blend of antioxidants, amino acids, vitamins, and methylsulfonylmethane (MSM).
- > Also contains fatty acids, which are excellent skin nutrients/lipid replacements, and dimethicone, which provides a breathable moisture barrier.
- > Doctor formulated and scientifically proven to protect skin.

**For more detailed information on Olivamine, ask your Medline representative for a copy of our Remedy Products brochure.*

Completely breathable side panels: Because airflow equals comfort.

Side panels on both the front and back of the Restore brief are 100% breathable. Improved airflow keeps residents comfortable and helps prevent skin irritation. Together with the Remedy-treated liner, this makes the Restore brief the leader in total skin care.

Additional features of the Restore brief:

- > Super-absorbent Ultra Care core ensures maximum dryness for greater comfort and healthier skin.
- > Refastenable tape tabs with new "grab anywhere" technology allow the best possible fit and also reduce waste-caregivers can quickly check brief and refasten.
- > Anti-leak leg cuffs perform up to 20% better than standard cuffs, helping to protect clothing, bedding, etc.
- > Soft, cloth-like outer cover is comfortable against skin; helps prevent irritation and rashes.

Ordering Information:

Item No.	Size	Case/Bag	Waist Size
RestoreM	Medium	96/12	32"-42"
RestoreR	Regular	80/10	40"-50"
RestoreL	Large	72/12	48"-58"

Extra wide refastenable tape tabs:

Better fit,
less waste

“We chose a resident [who] prior to using the Restore brief had a rash develop on her lower abdomen. After 5 days of using the Restore brief on this person, the rash had disappeared...This is one product that really lived up to the expectations that were set.”

Sister Madonna, Mount Saint Joseph Home
Lake Zurich, IL

Be ready for the new CMS guidelines...Make Restore briefs part of your incontinence care protocol.

The latest guidelines on incontinence care (F315) from the Centers for Medicare & Medicaid Services make it clear that nursing homes should take care to prevent skin breakdown associated with incontinence, stating that keeping perineal skin dry is an important step in avoiding skin maceration and skin erosion. Part of the CMS surveyors' investigative protocol is to check the skin integrity of incontinent residents. Medline's Restore briefs help not only to keep residents' skin dry but also to nourish and protect skin with the added Remedy Skin Repair Cream.

Improve your continence care budget with Medline's Fit Right Program

Proper sizing is the key to reducing costs and promoting patient care. Our Fit Right Program guides you through resident assessment and product selection, ensuring the best fit as well as the best product type for each of your incontinent residents.

Your residents will enjoy greater dignity, and you'll benefit from lower costs and less chance of survey deficiencies.

This comprehensive system includes detailed clinical and operational manuals, educational tools, and automated product utilization reports to make implementing and monitoring the program easy. Call your Medline representative for more information!
